Commissioner for Patents

see attachment

Art Unit: 2872

1. The reply filed on 10 July 2003 is not fully responsive to the prior Office Action because of the following omission(s) or matter(s): Applicant's attempt to modify the block diagram of Fig. 1 to include a "controller" block is not deemed to satisfy the objection to the drawings due to the fact that it would appear clear from the claims (i.e. claim 29) that the "controller" controls the position of the reflector elements. Thus, the "controller" block should be properly illustrated as being connected to each of the reflector elements with an appropriate electrical conductor. If the examiner is mischaracterizing applicant's invention, applicant is invited to call the examiner at the telephone number listed below. The examiner is of the opinion that the actual interconnection between the controller and the reflector element(s) is deemed necessary in order to facilitate a proper understanding of the operation of the device. The objection to the drawings will not be held in abeyance. See 37 CFR 1.111. Since the above-mentioned reply appears to be *bona fide*, applicant is given **ONE (1) MONTH or THIRTY (30) DAYS** from the mailing date of this notice, whichever is longer, within which to supply the omission or correction in order to avoid abandonment. EXTENSIONS OF THIS TIME PERIOD MAY BE GRANTED UNDER 37 CFR 1.136(a).

2. Any inquiry concerning this communication should be directed to R.D. Shafer at telephone number (703) 308-4813.
